A large, illuminated sign for Singapore is set against a lush, green living wall. The sign features the word "Singapore" in Arabic script, "سنغافورة", in white with a blue outline, positioned above the word "SINGAPORE" in large, bold, white capital letters with a blue outline. The background is a dense wall of various green plants, including ferns and broad-leafed species. The scene is lit with warm, ambient lighting, suggesting an evening or night setting.

سنغافورة
SINGAPORE

... WHO WE ARE?

Garden Spot is a Polish manufacturer of modular vertical gardens system Pixel Garden. We have been dynamically operating in the horticulture industry since 2008. We use our products in order to promote the idea of **GREEN WALLS**, which are more and more often used in both commercial and individual construction.

The products we offer set new standards in space design and bring freshness, color and health to the environment. Vertical gardens are interesting and unique way of growing plants in apartments, office spaces and public institutions.

Vertical gardens allow not only to increase the area of biological active surface without the need to find additional space, but also to bring nature closer and integrate it into an everyday room and to enjoy its presence.

PIXEL GARDEN SYSTEM

Idea of the system	8
Think green	10
Technology	11
Irrigation	12
PG14 model	14
PG09 model	16

... PIXEL GARDEN SYSTEM

Pixel Garden is modular system to build vertical gardens dedicated for living plants. The system is made of polypropylene which is manufactured from 100% recycled materials. Due to high resistance on UV radiation the system can be used both in indoor and outdoor environment.

The Pixel Garden module consists of case, two pots and connector. In our offer you can find:

- **Pixel Garden PG14** with a standard pot diameter of 14 cm, allows you to compose a vertical garden both in a small area in an apartment and an extent area on the facade of the building.
- **Pixel Garden PG09** with pots of diameter of 9 cm which we recommend to create very tiny green walls or in order to grow the herbs and vegetables.

The advantage of the Pixel Garden system is the possibility of removing the pot with a plant from the vertical garden, which facilitates, among others, changing the plant arrangement, replacing plants and carrying out plant care treatments.

PIXEL GARDEN SYSTEM ...

Modules are available in two colors light grey and black therefore they blend in easily with any interior.

Modules are assembled to the wall individually what allows you to create a vertical garden of any width and height. Each module is equipped with an integrated overflow system what allows for complete irrigation of the vertical garden by supplying water only to the highest row of modules.

The technology of Pixel Garden PG14 and PG09 modules allows you to irrigate the garden manually, semi-automatically and automatically.

All our products are certified, have UV resistance, strength and temperature resistance tests. PG14 modules also have a certificate confirming compliance with fire protection requirements.

... PIXEL GARDEN irrigation

The system is designed with a very innovative approach where the traditional way of irrigation is not required.

The water is vertically transferred from one container to another tanks to gravity, therefore, regardless of height, it only requires a single irrigation supply on the top row of any panel.

ALU LINE

Alu Line idea	22
Hanging vertical frames	24
Mobile vertical frames	26
Standing vertical frames	34

... ALU LINE

Alu Line is the series of aluminum frames with installed Pixel Garden system.

Hanging frames are easily attached to the wall. Vertical gardens in the wall version can be designed directly next to the wall without the need for assembly. The advantage of the mobile product is the use of the wheel system, which allows it to be easily and quickly moved and to change the interior arrangement.

Alu Line products are irrigated through an overflow system, i.e. manually or semi-automatically using an irrigation station.

ALU LINE ...

In our offer you can find also double sided option which can be used as the fences or screens in office and restaurant spaces.

A series of products available in aluminum frames launched a new Premium line, i.e. a combination of a vertical garden with a mobile irrigation station, available in our Alu Line Premium line catalog.

Vertical garden consisting of 36 Pixel Garden modules that can accommodate 72 plants (1 module = 2 pots).

The product is available in various combinations of black and white.

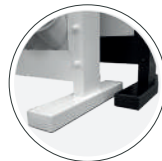

The board is made of high-quality, 2 mm thick, white lacquered metal sheet.

A refined, aluminum structure of high strength and high aesthetic values.

Overflow, integrated irrigation system in several configuration options.

Specially designed new shape of the legs, ensuring firm support and safety.

Smooth, scratch-resistant surface with magnetic properties.

Easy maintenance. Wiping with a dry magnetic sponge and washing with a blackboard cleaner.

Modules made of recycled plastic in two sizes and colours.

Many possibilities of use in commercial and educational spaces.

The possibility of any selection of accessories: pens, magnets or markers.

Possibility of any arrangement of ornamental plants, herbs or vegetables.

... WHITEBOARD WALL

The green wall with acoustic foams is the new Office Line product by Garden Spot.

The Acoustic Wall is a product for commercial spaces that combines a soundproofing and aesthetic function. Acoustic foams are a sound-absorbing element. Spaces separated by the Acoustic Wall, gain an aesthetic composition of foams on one side, creating an atmosphere of confidentiality, on the other side of the wall, the vertical garden fills the space with greenery, moisturizes the air and creates perfect conditions for work and meetings. Choose your own side of the Acoustic Wall.

The Acoustic Wall is available in two basic colors: white and black. Irrigation of the vertical garden takes place through the built-in integrated over-flow system.

The perfect complement to the Acoustic Wall are Whiteboard Wall and Water Wall Premium.

... PREMIUM LINE

Premium Line products are the flagship Garden Spot projects that are synonymous with high quality. They were designed with particular attention to details using the best materials available on the market. The line consists of the innovative version of the mobile wall Alu Line Premium and Water Wall Premium made of aluminum and stainless steel.

62

Alu Line Premium is double sided mobile green wall based on Pixel Garden. The base of the product is hidden water reservoir on wheels what makes it easy to move. Another advantage of products is the LED lightning installed along the glass panel and the decorative lava stones or snow-white Greek stones.

Premium Line was created for the most demanding customers. The products are available in several color variants.

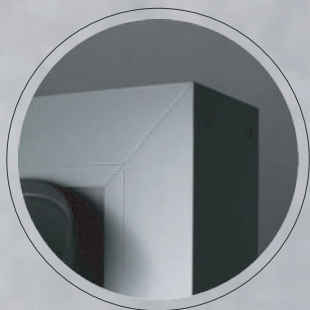

PREMIUM Line products are the flagship Garden Spot projects that are synonymous with **high quality**.

Alu Line Premium green wall

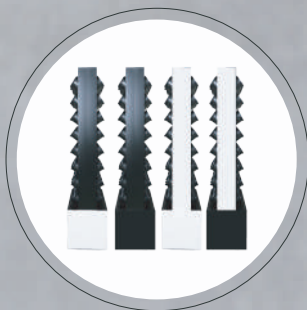

was developed by Polish designers with a view to be used in prestigious and luxurious facilities. It is a perfect idea for finishing the space. Greenery has positive impact on human's well-being – plants increase air humidity and introduce beneficial microclimate. Mobility gives an asset of changable arrangement in interiors such as houses, shopping malls or offices of big companies.

MY LITTLE HOME GARDEN

My Little Home Garden idea	100
Hanging vertical frames	102
Standing vertical frames	112

... MY LITTLE HOME GARDEN

My Little Home Garden is a ready-made vegetable garden that you just need to hang on the wall at home or on the balcony.

The product allows you to feel the taste and smell of freshly grown herbs, vegetables and fruits and the built-in overflow irrigation system will make it using it simple and pleasant.

The advantages of the home vegetable garden:

- constant access to fresh vegetables, fruits and herbs
- food self-sufficiency
- own, undemanding, individual production
- products chemical-free from plant protection products
- budget saving
- unique decor of each kitchen

Just fill the top row of pots with water and it will be delivered to the pots below through a special overflow system.

DECORATIVE POTS

Decorative pots

106

Offer of pots

108

... DECORATIVE POTS

The highest quality handmade **flower pots**.

We present handmade pots in excellent workmanship. The design have been developed by experienced and creative artists, inspired by the idea of biophilic design.

The concept of biophilic design is a relatively recent trend, which is gaining popularity all over the world. Its main assumption is to create a working or living environment in the manner referring to nature.

Such solutions are particularly important in large cities, where progressive urbanization deprives residents of green areas. Our exclusive pots made of natural materials fit perfectly into this trend.

ACOUSTIC BOXES

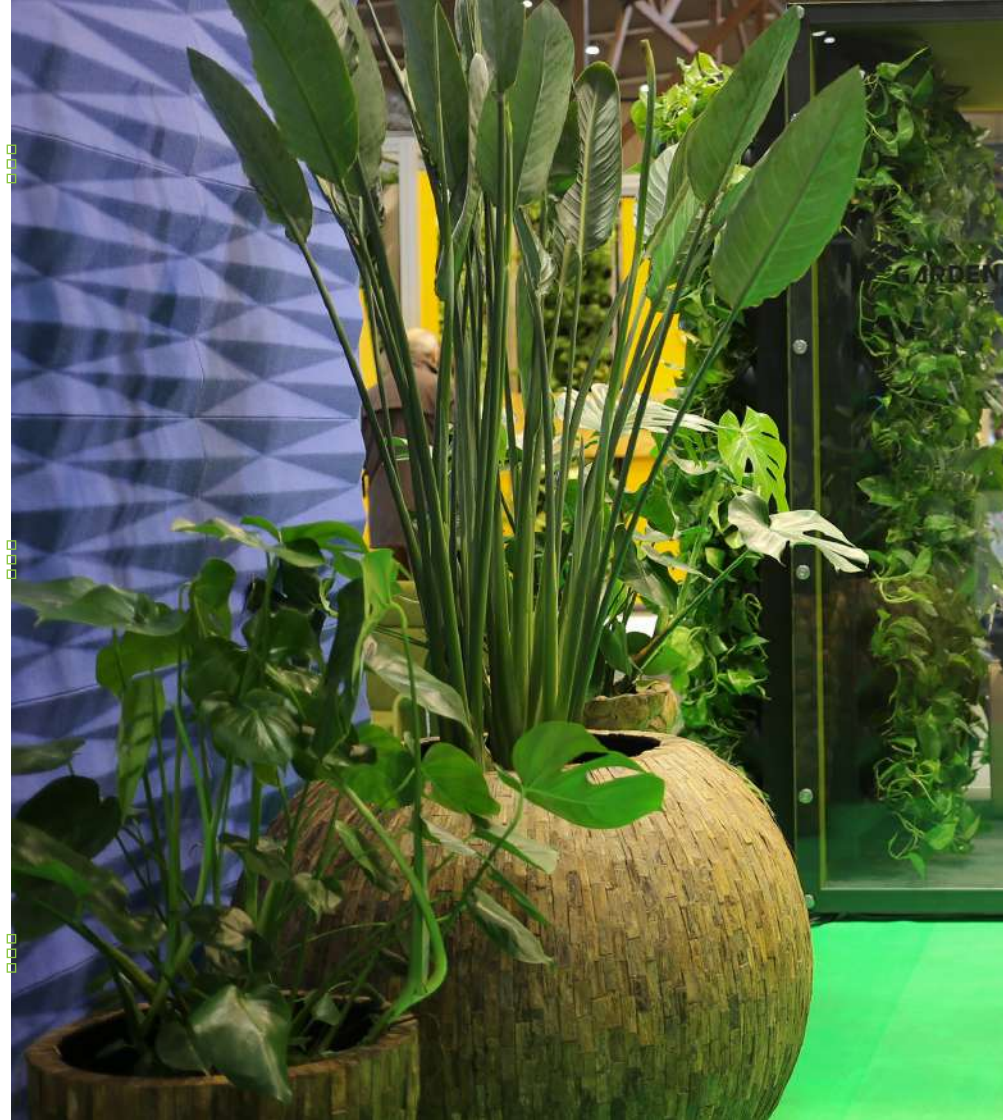

Acoustic boxes idea	118
1 person boxes	120
2-3 person boxes	122
6 person boxes	124

... ACOUSTIC BOXES

Acoustic boxes are perfect solution as a form of asylum for temporary rest and at the same time a place for conducting a briefing or conferences. The boxes are available in option for 1, 2/3 or 6 people.

Acoustic box filled with the greenery allows its users to minimize the negative impact of pollution on the human's health and to improve the living conditions and comfort.

- BIOPHILIC DESIGN
- SOFT SOUNDPROOFING
- ADJUSTABLE LED LIGHTING
- QUALITY AND EFFICIENT VENTILATION
- USB + USB CHARGER SOCKET
- MODULAR ARRANGIBLE
- DIETED SYSTEM FOR BICHARD
- AIR QUALITY SENSOR
- LIGHT LEVEL SENSOR
- NOISE LEVEL SENSOR

ACOUSTIC BOXES ...

A few minutes in the green relaxation zone immediately improves the level of well-being and reduces stress what increases the efficiency of employees.

The walls of the box are upholstered with fabrics with acoustic properties. The sound is also insulated by glass with high phonic parameters and by natural, living plants in the Pixel Garden vertical gardens with an integrated irrigation system.

Specification

- free standing upholstered pod for 1-person
 - featuring door made of safety glass
 - side walls with diamond pattern inside, smooth upholstered back wall
 - floor covering
- Equipment:
- lighting and ventilation with a motion detector
 - connection panel: 1x 230 V + 2x USB (charger) in an upholstered shelf with a SwissCDF top in graphite colour height 115 cm
 - option: different color of upholstery inside (box body and upholstered shelf sides, and back wall) and outside (box body and back wall) within one kind of fabric

Biophilia Box 1P.B

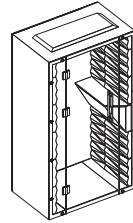

SPECIFICATION:

- free standing upholstered pod for 1 person
- featuring door made of safety glass
- two-sidedly diamond patterned side walls, smooth upholstered back wall
- floor covering

Equipment:

- lighting and ventilation with a motion detector
- connection panel: 1x 230 V + 2x USB (charger) in an upholstered shelf with a SwissCDF top in graphite colour height 115 cm
- option: different color of upholstery inside (box body and upholstered shelf sides, and back wall) and outside (box body and back wall) within one kind of fabric

Biophilia Box 1P.C

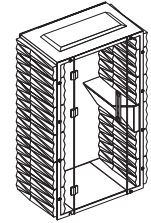

SPECIFICATION:

- free standing upholstered pod for 1 person
- featuring door made of safety glass
- side walls with diamond pattern inside, back wall made of glass
- floor covering

Equipment:

- lighting and ventilation with a motion detector
- connection panel: 1x 230 V + 2x USB (charger) in an upholstered shelf with a SwissCDF top in graphite colour height 115 cm
- option: different color of upholstery inside (box body and upholstered shelf sides, and back wall) and outside (box body and back wall) within one kind of fabric.

Biophilia Box 1P.D

SPECIFICATION:

- free standing upholstered pod for 1 person
- featuring door made of safety glass
- two-sidedly diamond patterned side walls, back wall made of glass
- floor covering

Equipment:

- lighting and ventilation with a motion detector
- connection panel: 1x 230 V + 2x USB (charger) in an upholstered shelf with a SwissCDF top in graphite colour height 115 cm
- option: different color of upholstery inside (box body and upholstered shelf sides, and back wall) and outside (box body and back wall) within one kind of fabric.

LAWN LATTICE

Lawn lattice idea	134
Garden Grid 2.0	136
Parking marker	137
Anchor	138

... **LAWN LATTICE**

Garden Grid lawn lattice is environmentally friendly product manufactured from recycled materials. It is an alternative to standard ground stabilization methods such as paving stones or open-work slabs. Due to the high quality and excellent strength parameters, Garden Grid is used primarily in construction, gardening and transport.

134 The compact structure of the Garden Grid ensures high load resistance and resistance to deformation under high pressure (even up to 350 t/m²).

LAWN LATTICE ...

An additional advantage is the optional anchoring system that allows the GG to be mounted on slopes, also these with a high angle of inclination, and very good drainage properties that allow rainwater to freely penetrate into the ground - the biologically active area is 86.6%.

We own the certificate in terms of production of plastic products ISO 9001: 2015.
